

***** NOTICE *****

Sunsetting of Older Record Types - CIBER 2.0
(Type 10, 11, 20, 30, 50 and 70 Records)

Due to industry feedback and comments, Cibernet is proposing the December 16, 2006 - January 15, 2007 settlement period as the flash-cut date that carriers will no longer be able to exchange the older record types between each other.

On January 16, 2007, the designated clearinghouses (DCH's) will have an edit in place that would prohibit the exchange of the older record types, thus rejecting these records.

Also, as a reminder, as of March 16, 2006, Cibernet will remove the older record types, associated tables and data definitions from the CIBER manual and these records will no longer be considered "CIBER Compliant."

Cibernet is soliciting feedback and comments, regarding this notice. Please feel free to forward your comments to me at gcox@cibernet.com or to Mary Clark at mclark@cibernet.com by March 16, 2006.
